Fireball Car Care Solution

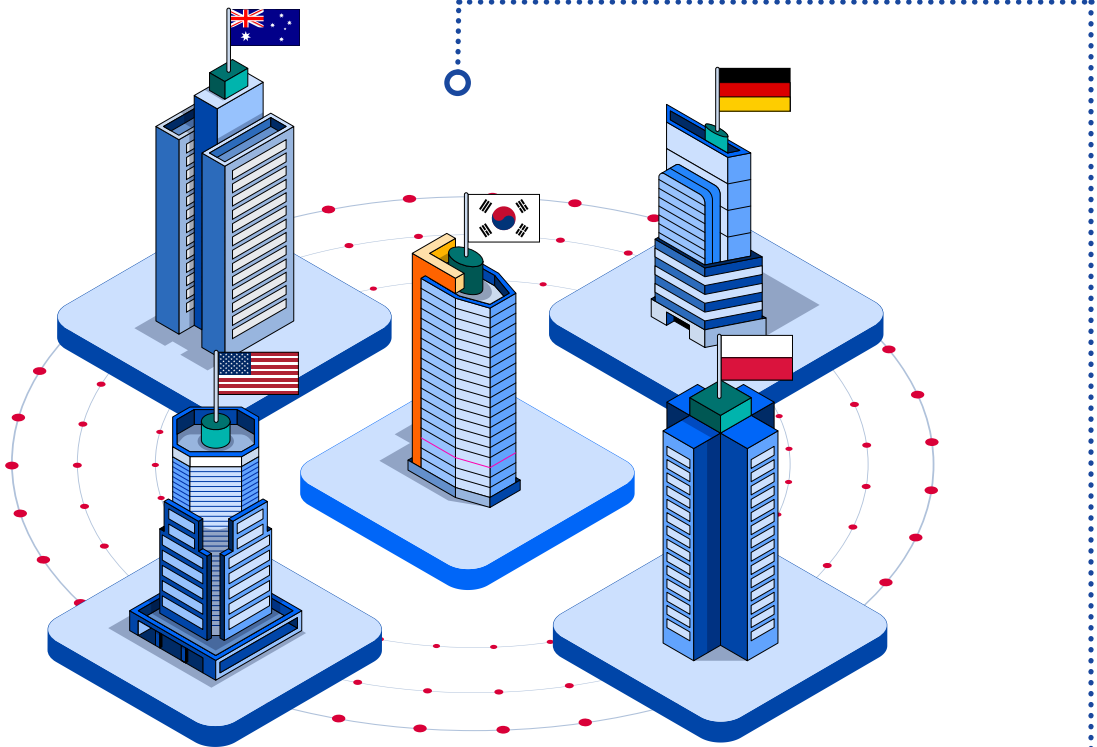

ABOUT

Since our conception in 2002, our mission has been to implement revolutionary solutions to inspire the car – care market and define its future. We oversee every aspect of formulation, ensuring products are generated to our precise liking. Our inventive process inside state – of – the – art facilities affords us freedom from issues one may encounter when waiting on a third-party.

Fireball strives to be Eco – friendly. Sparing no effort in resourcing organic, unpolluted ingredients. We offer professional grade maintenance and detailing products, but our ceramic coatings line is exclusively installed by a selection of qualified professionals; vetted by method of thorough training and examination. Fireball's customer service and willingness to help encourages a growing network of Installers.

GLOBAL DISTRIBUTION

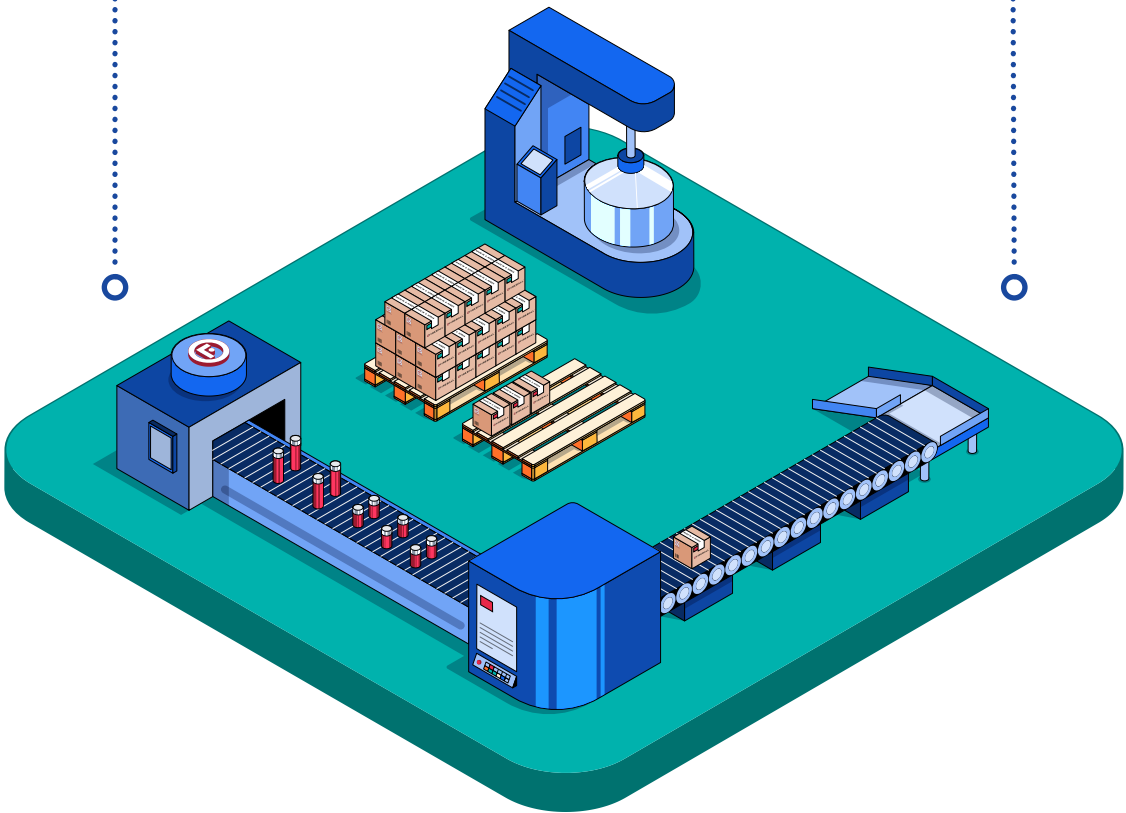

Fireball was established in Busan South Korea, and has become one of the largest manufacturers of specialty car detailing products – and we're continually expanding. Increasing production, our factory now exports to countries globally; including Poland, Australia, New Zealand, Canada, Russia, United Kingdom, Singapore, Germany, Pakistan, United States, Puerto Rico, Congo, China, France, Indonesia, Malaysia, Norway, Brazil, Turkey and more to come. Each country locally distributes products to over two thousand installers globally.

Fireball USA's distribution center is operated in Missouri and our Training Headquarters resides just across the border in Kansas. With a wide variety of merchandise, Fireball distributes products nationwide to enthusiasts and certified installers.

PRODUCTION

Science and technology in South Korea has advanced throughout the decades. Our development and manufacturing process is unlike any company on the market. We are committed to redefining the detailing process by combining innovative products with cutting edge technology for an overall better car care experience. Managing all aspects of our manufacturing process allows us to ensure quality, speed, and accuracy within each product, down to the individual inspections and tamper – proof seals, before going to our in – house packaging and shipping department.

Research and development are fundamental to our philosophy; we are constantly working to upgrade our formulations and production processes. In the pursuit of advancement, South Korea has taken a centralized approach, as South Korea has widely become known as one of the top global innovation leaders.

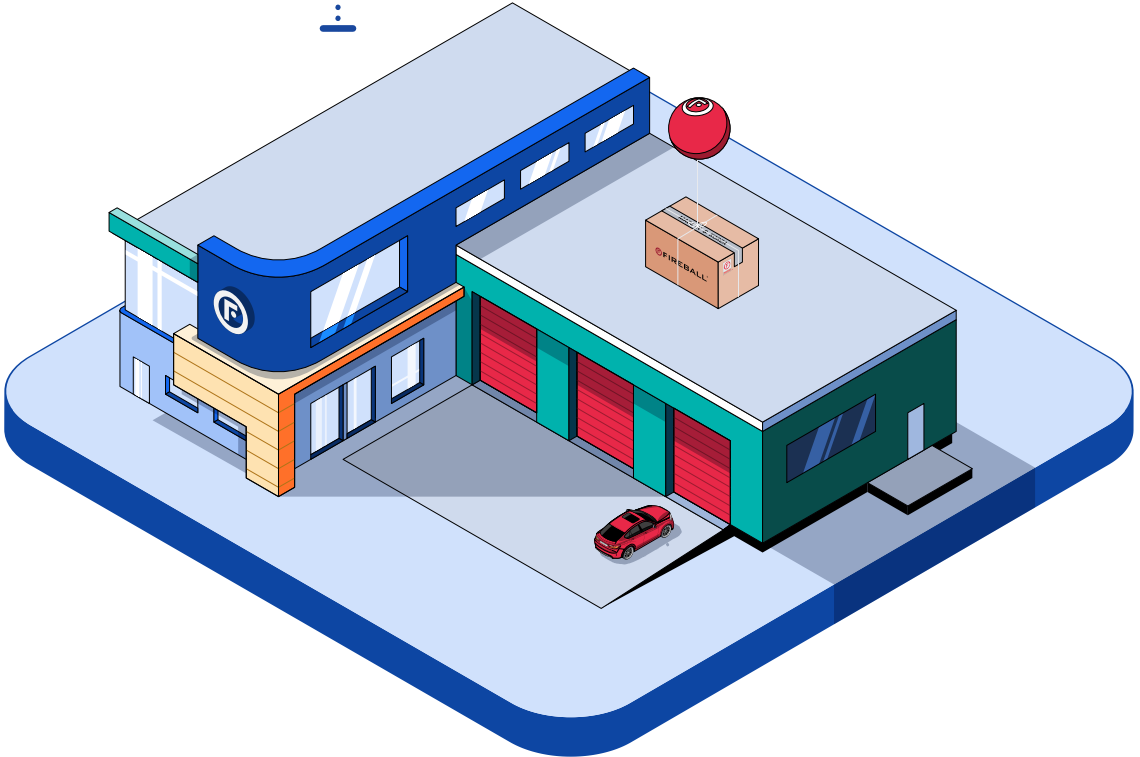

HOME / SHOP DELIVERY

Fireball is at the forefront of the detailing and coating industry. Innovation is in our DNA – we're constantly pushing boundaries and breaking barriers with improved detailing solutions for hobbyists, enthusiasts, and detailing professionals. The research and development of our products produce the absolute best for all of our customers, no matter who you are.

Fireball strives for equality and fair territories. We understand our decisions not only impact us, but you as well. Unlike other companies, we take pride in our partnerships and stand behind our word. Our goal is to help you grow your business, provide leads, and not reduce clientele by a congestion of certified Installers.

We strive for a 25 mile territory for each of our installers, may vary on population.

CERAMIC COATINGS

# 유리막코팅제

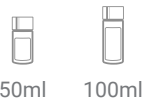

## FIREBALL COATINGS

Fireball Coatings have the highest concentration of ceramic SiO<sub>2</sub> content on the market—with a combination of up to six types of Si & SiO<sub>2</sub> raw materials. The Ceramic SiO<sub>2</sub> blends vary from one coating to another, providing distinct characteristics for each coating. These differences provide properties that excel in various environmental situations including chemical, abrasion, dirt, wet, and high temperature environments / applications.

Fireball Coatings have unique dual – bonded SiO<sub>2</sub> molecules that create a stronger covalent bond for the coating surface integrity, finish, clarity, and depth. Dual – bonded molecules also increase micro scratch resistance. The covalent bond of silicon dioxide has a full outer shell structure and can further bond with other silicon atoms, weaving the formation of a protective covalent structure.

Titanium provides extreme protection against harmful uv Rays for all coated surfaces. As one of the most corrosion – resistant materials on Earth, titanium provides extra protection against wear and tear, micro – scratches and abrasions. It also protects your investments by breaking down contaminants like dirt or pollen that cause damage over time. Titanium plays a huge role with the optical clarity of colors and pigments of the underlying surfaces.

Ceramic Coatings come in 50ml & 100ml glass bottles. Sizes may vary.

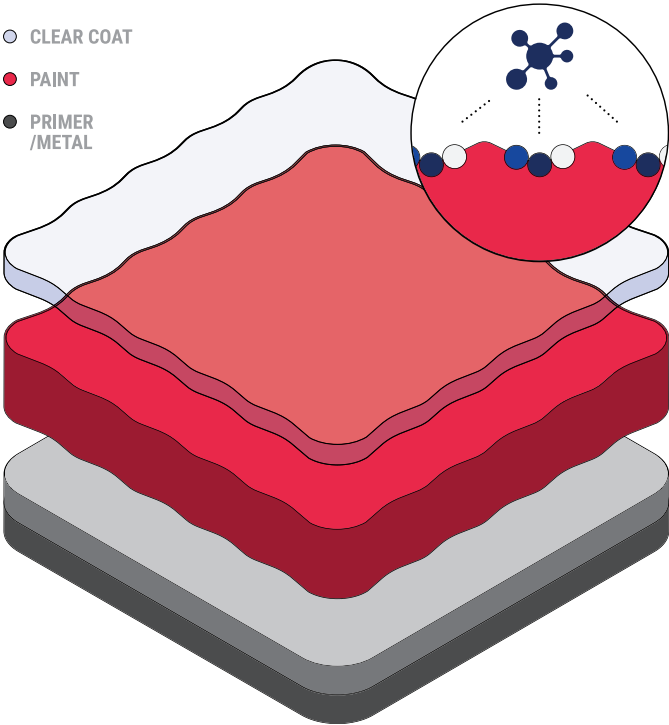

## CERAMIC COATING BREAKDOWN

When viewed microscopically, car paint is neither smooth nor flat. It is an irregular surface filled with pores and inconsistencies. Installing a ceramic coating provides an additional barrier of paint protection, by using microscopic SiO<sub>2</sub> Nano particles to fill in the discrepancies and overlay the surface with a smooth, glass – like surface. Once the coating bonds to the surface—the coating goes from a liquid to a solid – state, creating a hard shell layer. As the ceramic coating cures it becomes more durable and enhances the overall gloss levels of the vehicle. This layer now protects the underlying surface from minor scratching, etching, and uv fading. The ceramic coating also works as a repellent; repelling water, dirt, dust, debris and chemical fall out, ensuring the surface stays clean longer.

Unlike any other ceramic coating on the market, Fireball coatings undergo a series of chemical reactions after application. We call this chemical reaction, synthesis hard – shell technology. To put it simply, the coating first bonds to the surface being coated – then, after being wiped down by the installer, the coating self levels, and has a final chemical reaction to hard – shell the coating from a liquid to a solid – state. This results in higher gloss, better surface integrity, increased hydrophobic properties, more durability, and minimal shrinkage.

## SILICON DIOXIDE (SiO<sub>2</sub>)

Fireball Delivers the latest in ceramic coating technology. Our highly advanced silicon dioxide (SiO<sub>2</sub>) coatings bonds with the surface on a molecular level, creating an extremely durable layer of protection.

**SILICA (QUARTZ):** SiO<sub>2</sub> is a chemical compound that appears naturally in several crystalline forms. Silica is one of the most complex and most abundant families of materials.

## TITANIUM OXIDE (TiO<sub>2</sub>)

TiO<sub>2</sub> is typically thought of as being chemically inert, meaning it is less likely to react with other chemicals. The benefits of titanium dioxide are vast; it can be found in various products, including sunscreen and paint. Protecting from harmful uv rays while also preventing degradation to plastics. This means that TiO<sub>2</sub> keeps your beautiful new car looking like new, longer.

# COATING PROTECTION

Ceramic coatings elevate a vehicle's paint job by providing a resilient coating that offers superior protection against light surface scratches, harmful uv rays, graffiti, brake dust, oxidation, weathering, bird droppings, dirt build-up, bug residue, premature aging, and acid rain stains. Cars with high-quality ceramic coatings are easier to clean and remain clean longer due to their hydrophobic properties.

## GLASS

Glass coatings reduce nighttime glare while protecting against corrosion, acid rain, and mineral build-up. Hydrophobics increase visibility and self-cleaning effects that repel water and ice. Also minimizing windshield wiper necessity.

## PAINT

Utilizing state-of-the-art technology to create coatings that cure into a hydrophobic shield. Our crystal-clear coatings offer an unrivaled amount of protection with above 9H hardness and never affect the original paint hue.

## TRIM

A plastic rejuvenator and color protectant that withstands extreme temperatures, repels contaminates, and protects from uv rays. The hydrophobic formula is optimized for trim molding, bumpers, cowl, roof rails, and engine bay covers.

Tip: While each coating option can provide benefits, all have different strengths. Ceramic sealants and waxes are not as durable compared to hard-coat SiO<sub>2</sub> coatings.

## TEXTILE

Delivering superior stain resistance in a non-toxic formula. The hydrophobic barrier protects most fabric-based interiors from dirt, and oil. Shielding textiles from fading or discoloration while intensifying color depths and overall look.

Fireball offers an extensive line of protection products for all types of surfaces. Every product is formulated for unique characteristics and optimized for specific protective needs. Professional installers will work directly with their customers to offer them the best protective investment options based on information like vehicle protection needs, budgetary limits; what environment you are going to be experiencing, etc.

## WHEELS & CALIPERS

Talon is a high-temperature coating for wheels, brake components, engine parts, and other high-heat surfaces. Installing a coating provides resistance against rust and corrosion while adding durability, gloss, and shine.

Dok Do is for prestigious vehicles where no compromise is requested by a customer.

독도

AFTER CARE

The best way to protect a coat of paint is by investing in a high quality ceramic coating. While ceramic coatings offer a high level of paint protection, no coating is invincible. Ceramic coatings require regular maintenance to provide the estimated length of protection.

Selecting the correct washing supplies is an essential part of maintaining a ceramic coating. If a shampoo contains the wrong chemicals or incorrect pH it can ruin a high quality ceramic coating in just a few washes. Fireball offers a complete line of applicators, ceramic sealants, ceramic waxes, cleaners, ceramic dressings, all pH – neutral shampoos, towels, and washing accessories on our website. Our expansive product line makes it easy to maintain a ceramic coating to its estimated life expectancy and beyond.

To maintain peak surface protection, follow our maintenance guide (fireball-usa.shop/maintenance). Ceramic coating care begins with a frequent washing routine that follows proper cleaning methods and utilizes pH – neutral products. Applying ceramic sealants, such as Pirouette or Grace will supplement coating properties for added duration and protection.

High quality ceramic coatings will include a warranty that could span years. Be sure to follow all terms of the warranty, including yearly or bi – yearly visits with your Fireball Certified Installer.

# LUXURY CAR WAX

Fireball Show Car Waxes are hand – crafted for enthusiasts that demand perfection. The luxury paste wax protects your vehicle against elements caused from daily driving; such as water spots, stains, contamination, and uv solar rays. Fireball Waxes are infused with silicon dioxide (SiO<sub>2</sub>) technology that enhance the shine, gloss and color depth of your vehicle.

Fireball Waxes are developed with the world’s highest quality paste wax. Our extremely easy – to – use wax creates the ultimate application experience. Show car waxes can be applied to all vehicles; old and new to create a durable layer of protection. The perfect selection for any luxury and exotic vehicles that demand the highest quality for brilliant shine and slickness with durable protection.

Black      Acrylic      Square

## BLACK EDITION

Black Edition Waxes come in 150ml premium black containers. Wax applicator included in box.

### INCLUDES:

- Alien Blood
- Brazil
- Butter
- Candy Sherbet
- Cherry Blossom
- Fusion
- Ghost
- Graphene
- Milk Cream
- Sexy Lady

## ROUND ACRYLIC EDITION

Round Acrylic Waxes are available in 100 & 200ml premium acrylic containers with a magnetic lid closure. Wax Applicator included in box.

### INCLUDES:

- Alien Blood
- Brazil
- Candy Sherbet
- Cherry Blossom
- Graphene
- Milk Cream
- Sexy Lady

## SQUARE ACRYLIC EDITION

Square Acrylic waxes are available in 200ml premium acrylic containers with a magnetic lid closure. Wax Applicator included in box.

### INCLUDES:

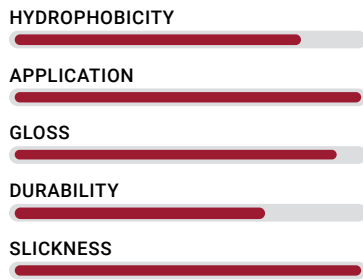

- Alien Blood
- Brazil
- Candy Sherbet
- Cherry Blossom
- Graphene
- Milk Cream
- Sexy Lady

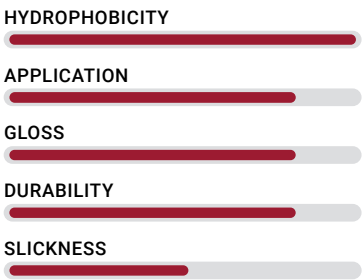

ALIEN'S BLOOD

Our handcrafted wax is up to 32% Pure T1 Carnauba, which creates hydrophobic properties and increases color saturation to any colored vehicle. Aliens Blood can be used as a stand alone product or as a topper for any Fireball Coating. With ease of application, Alien's Blood gives up to 3 months of protection.

BUTTER WAX

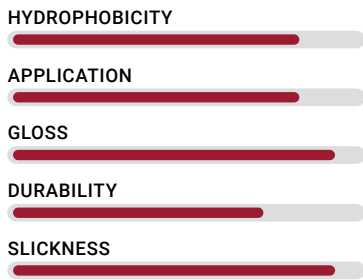

Butter Wax is a soft wax designed to enhance user experience. The simple wipe on, wipe off formula smells amazing and shortens work time while producing a streak – free shine within minutes. Thanks to its carefully selected ingredients Butter Wax provides the best super hydrophobic properties with the deepest wettest look imaginable. In a matter of a few simple steps, this buttery soft wax makes it fun for anyone who wants their car looking like new again without all those complicated techniques often needed when using traditional waxes.

Black

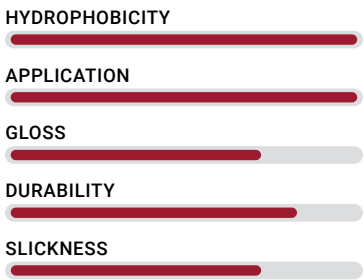

MILK CREAM

Milk Cream is the perfect choice for anyone looking for an easy – to – apply car wax that will give their ride a smooth, shiny finish – thanks to its advanced silicon dioxide technology. The ultra smooth, soft touch feel and silky creamy finish, makes this the perfect way to give your car the showroom look it deserves.

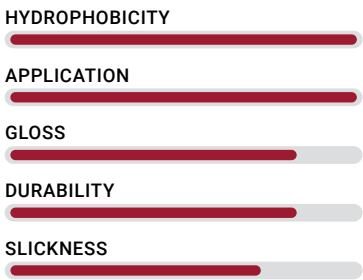

CANDY SHERBET

Our hand poured Candy Sherbet contains T1 Carnauba based wax that provides a vivid luster, car show – stopping shine, and increased color depth that'll last up to 3 months. This wax adds a darker impression to dark color cars and color saturation to bright color cars.

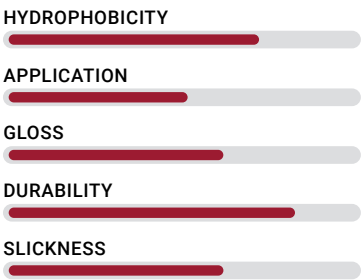

GRAPHENE

Our Graphene infused Wax adds a deep, dark shine on your black paint job or a rich shade of color on lighter finishes. The graphene additives provide a water repellent, silk smooth finish, and heat resistance. Graphene Wax is the perfect way to achieve an unbeatable shine and stunning visual effects.

WHEEL WAX

Wheel Wax uses highly refined synthetic nano – tech polymers and carnauba to bond directly to the surface for long – term durability. This protective coating causes water and iron brake contaminants to bead off the surface making wheel cleaning simple and easy – and helps prevent permanent damage to your wheels. This high temperature wax fights off the harsh effects of the environment and creates a brilliant glassy shine with the proprietary technology.

Black

Black

Acrylic

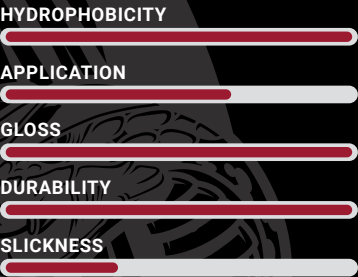

Square

# GHOST WAX

Ghosts Wax is the ultimate choice for anyone looking to achieve a deep and brilliant shine. Thanks to its advanced super hydrophobic ceramic polymers, raindrops roll right off your car giving you the ultimate durability. While also producing deep reflections and increased beading and sheeting properties that makes this product ideal in any situation. Ghost Wax is a hard paste wax that uses just one layer to enhance any color paint, while adding contrast. If you're looking for supreme quality then there's no match when using Ghost Wax.

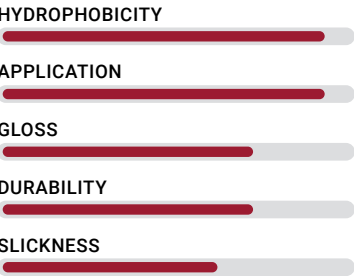

Black

## CHERRY BLOSSOM

Cherry Blossom is a hybrid blend of carnauba and gives off a deep aroma of fresh cherry blossoms. The unique formula absorbs into the paintwork which creates a smooth surface, leaving no microscopic pores untouched. Cherry Blossom adds the perfect blend of a warm glow and sparkling shine while restoring the clarity to any color of paintwork. Whether you're a professional detailer or just enjoy making your car look its best, it's hard to go wrong with the rich shine that comes from Cherry Blossom Wax.

Black

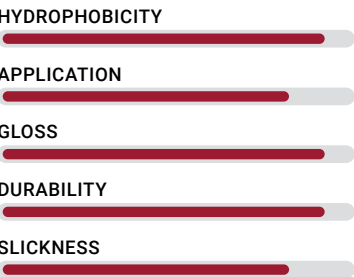

Acrylic

Square

## SEXY LADY

Sexy Lady Wax is our best in – class gloss hand poured carnauba wax. Thanks to the innovative combination of unique raw materials and the high content of Carnauba, it protects the surface and gives it excellent hydrophobic properties and a perfect shine.

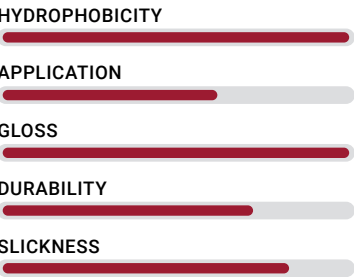

Black

## BRAZIL

Brazil Wax adds a deep, glossy finish. This premium wax is handcrafted with 40% pure T1 Carnauba, and guarantees a stunning shine that will last. The easy application makes it simple to get that perfect look, & the intense water repellency keeps your car looking it's best for up to 3 months.

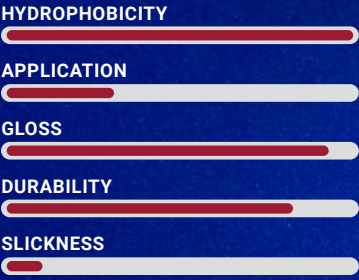

Black

FUSION WAX

Fusion Wax is the most technologically advanced hand wax on the market. The combined properties of pure high quality Brazilian carnauba and ceramic SiO<sub>2</sub> provide chemical resistance against road grime, dirt, water spots, and harmful uv rays while keeping water and the contaminants they carry from sticking to the surface.

 Black

TOURBILLON

Tourbillon is a hybrid coating that bonds to all Fireball Waxes. Extending and boosting the waxes life expectancy up to 3 – 6 months, while increasing slickness, and hydrophobics to the waxed surface. Leaving behind unparalleled gloss and color depth (pg. 26).

SPECIAL EDITION WAX KIT

Our premium handcrafted, hand paste wax sample kit is an excellent way to enhance your vehicle's paint while providing maximum protection with multiple options to choose from. At the core of our formulas are our ultra hydrophobic hand crafted waxes that are poured individually and presented in our glass 50ml jars.

INCLUDES:

- Brazil Wax
- Alien Blood
- Candy Sherbet
- Milk Cream
- Graphene Edition

250ml of wax total.

A graphic is displayed on the box to ensure you choose the correct wax for the desired results that you are looking for.

The Limited Edition wax set comes in a premium box with a magnetic lid. Included inside is a scoop for application, applicators, and five of our most popular hand – paste waxes.

## CERAMIC SEALANTS

Fireball's high quality ceramic sealants protect exterior surfaces from harsh environmental elements while enhancing surface clarity. Each sealant product offers unique characteristics.

Our most budget – friendly sealant, Easy Coat, is also the most user – friendly. Delivering outstanding results with minimal effort. Carnauba's quick detailer formula gives surfaces a glowing effect. Pirouette provides increased surface protection from harmful elements with a smooth, glass – like finish and is the recommended product of choice for maintenance on ceramic coated vehicles. Grace supplies the perfect combination of sealant features by uniting increased slickness and hydrophobic properties; with easy – to – use applications and quick detailing capabilities. Nano Coat And Extreme Nano Coat offer a comparable installation; extreme Nano Coat offering a slight increase in performance and protective features.

Ceramic Sealants come in multiple sizes. Ranging from 30ml-20L. Sizes may vary.

## CERAMIC PROTECTION FOR SHOWCAR WAXES

30ml

### TOURBILLON

Fireball's Tourbillon is a booster for Fireball's paste waxes that extends the durability of slickness and hydrophobics on the paint (3-6 months). This durable layer of surface protection will enhance both the color and the gloss.

- Works with all SiO<sub>2</sub> Waxes
- Extreme gloss & slickness
- Works on Fireball ceramic coatings with wax on top
- Extends life of wax & coatings

## NEW COATING ITEMS

30ml

### GLASS SHIELD

This product is a water repellent coating for car windows that will keep your view clear by blowing away rain during rainy driving. It is based on silicone oil with fluorine, which enhances the durability, and it is designed to be easy for anyone to apply. After applying, just wipe it with a clean microfiber towel after a short while. Glass Shield is a high-polymer silicone oil that has been specially designed and developed to show excellent water repellency, and you can see the rain blowing away a little at a speed of 50km/h.

- Remove raindrops from 50km/h.
- Provides a clear view
- Excellent water repellency
- Excellent chemical resistance.

30ml

500ml

### ANGEL TEARS

This product is a paint coating agent based on silicone oil. It contains 3-7% SiO<sub>2</sub>, the main ingredient of Ceramic coating agent, which forms a thin film after application to improve gloss and provide excellent water repellent and soft surface. It is the best paint care agent that maintains the clean surface of your car like a new car at a reasonable price, which is more affordable than the high-priced Ceramic coating cost at a professional installation point, with easy workability that anyone can easily apply the coating and durability that shows performance for 3-6 months with a single application.

- Super-Hydrophobic.
- Slick Appearance.
- Extreme gloss.

30ml

500ml

### NANO COAT V.2

This product is a paint coating agent that incorporates micro SiO<sub>2</sub> technology. It contains a large amount of SiO<sub>2</sub>, which is the raw material for glass coating agents, at 10-15%. After application, it forms a thin film that enhances the luster of the car surface and has excellent water repellency. It shows excellent durability for up to 6-10 months with a single application.

\* If you do a secondary layering a week after application, it will show better performance and durability.

- Super-Hydrophobic.
- Extreme gloss.
- Micro SiO<sub>2</sub> Technology.

# #1 IN COATING MAINTENANCE

## SHOW CAR WAX (DUKE)

Fireball Show Car Wax (Duke) is a spray-type care agent with excellent gloss and water repellency, which shows the gloss and color that you can see at the vehicle show.

- Excellent gloss.
- Excellent water repellency.
- Slick appears.
- Spray-type Show car wax
- Easy to use.

## GRACE

Grace is the ultimate ceramic infused SiO<sub>2</sub> sealant for all painted surfaces that coats your vehicle in a protective layer. The technology of the formula provides an anti-static surface that repels dirt and dust particles to minimize future maintenance and upkeep. Grace intensifies the depth of color and gloss, for a stunning finish and creates a smooth surface that's soft to the touch like you've never seen before.

- Added protection up to 1 months
- Enhances depth of color and gloss appearance
- Anti-static formula that repels dirt and dust
- Safe on all paint surfaces

500ml

4 Liter

# #1 IN COATING MAINTENANCE

## PIROUETTE

Pirouette adds an outstanding glass-like, smooth, and sleek finish to surfaces. This multi-purpose surface management coating contains a blend of silica dioxide, micro-silica, and synthetic polymers providing a layer of increased gloss and depth and an anti-staining effect with excellent water repellency. Pirouette can be used as a stand-alone coating or as a maintenance for ceramic coatings. Can be used wet or dry.

- Hydrophobic boost for paintwork, glass, & wheels
- Excellent weather & uv resistance
- Heavy chemical resistance
- Extended durability

## CARNAUBA WAX

Carnauba Wax contains T1 carnauba wax and advanced polymer technology that fills microscopic pits, pores, and valleys leaving behind an ultra smooth surface. This easy one-step application polishes in less than half the time it takes to hand wax. The all-in-one detail spray extends and enhances your vehicle with an innovative formula that can either reinforce existing coatings or be used as a stand alone product.

- Long lasting high gloss finish
- Inhibits contamination from adhering to surface
- Easy to maintain
- Can be used as a topper or stand-alone product

## MINI SAMPLE KIT

Are you new to Fireball and wanting to try out products without having to purchase the entire bottle? Maybe you would like to have a travel set of products to take with you to car shows or simply would like to create a package for your customers. Look no further, we have packed together samples of our Top 12 products into this care package for you.

### INCLUDES:

- Pirouette
- Hydro Foam
- Shampoo Pearl
- Wheel + Iron
- Glass
- pH3 Shampoo
- Tire Satin
- Hydro Shampoo
- Nappa Coat
- Nappa Cleaner
- Latest Show Car Wax Graphene
- Fireball Tire Applicator

# CLEANERS

Searching through cleaning products can be overwhelming; with the unlimited number of eye – catching labels and empty promises. Without doing a ton of research, it is impossible to know which products are reliable and safe to use. Fireball makes choosing the right cleaning solution stress – free.

Nappa Cleaner is a multipurpose cleaning solution that is safe on surfaces while being tough on troublesome stains. Glass, one of our most versatile formulas, is not limited to automotive glass but is also effective as a clay lubricant or as a quick detailer on ceramic coated surfaces. Wheel & Tire is a concentrated cleaner and degreaser; formulated to remove hard – to – clean road grime. Safe to use on a variety of surfaces, including engine compartments.

Our customers can literally breathe easier knowing that all Fireball products provide environmentally friendly and easy solutions for cleaning all vehicle surfaces without harmful chemicals.

Cleaners come in 50ml, 500ml, & 4L containers.  
Sizes may vary

## DILUTION REQUIRED

## IRON BURN SE

Iron Burn SE innovates with an enhanced economic advantage due to its highly concentrated formula. It completely exfoliates the surface using a high – tech, color changing formula, allowing a better bonding topcoat that ensures coatings adhere to the surface properly. Without removing iron contaminants, the coatings will not be able to fully adhere to the surface and will likely cause premature failure.

- Prevents surface oxidation and corrosion
- Safe on paint, glass, wheels, rims, vinyl, film, & plastics
- Ensures maximum performance of nano ceramics
- Powerful iron contamination removal

## WHEEL & TIRE

The beauty of Wheel & Tire lies in its versatility when diluted to different strengths. This ultra powerful formula is used to thoroughly clean wheels, tires, and more. Based on an excellent adhesion effect, Wheel & Tire quickly changes color and removes the contaminants without damaging the surface.

- Can be used on exterior surfaces
- Color changing formula
- Removes dirt, tire browning, salt, baked – on brake dust, road grime, & more

## NO DILUTION REQUIRED

## IRON BURN

Iron Burn completely exfoliates the surface using a high – tech color changing formula allowing a better bonding topcoat that permits coatings to adhere to the surface properly. When applied to a vehicle, the clear, acid – free, pH – balanced solution will turn purple upon contact as it chemically dissolves the contamination without any scrubbing or abrasive contact.

- Prevents surface oxidation and corrosion
- Safe on paint, glass, wheels, rims, vinyl, film, & plastics
- Ensures maximum performance of nano ceramics
- Powerful iron contamination removal

## WHEEL + IRON

When applied to a vehicle, the clear, acid – free, pH – balanced solution will turn purple upon contact as it chemically dissolves the contamination without scrubbing or abrasive contact. The combination of technology eliminates performing a multi – step process with numerous products, saving you time and money.

- Safe on all rims: powder coat, aluminum, painted, matte, etc.
- Removes brown staining on tires, brake dust, dirt, and grime
- Prevents surface oxidation & corrosion
- High in pH neutral making it stronger & more effective

BUG CLEANER

Bug cleaner contains raw material that quickly and safely break down proteins from bugs and other bio – contents without having to scrub, making the removal process effortless. Safe for use on most exterior surfaces including PPF, plastic trims, and coated /non-coated vehicles.

- Solvent – free
- Quickly & safely removes bugs & other bio contents
- Safe on PPF, plastic trims, & coated / non – coated vehicles

NAPPA CLEANER

This powerful decontaminate contains proprietary surfactants to remove dirt without leaving behind an oily residue and restores the surface back to its original, sleek sheen. The innovative blend not only specializes in moisturizing but helps prevent electrostatic build – up and anti-cracking functions. Can be used as a spray or in a foamer bottle.

- Brings leather, vinyl, & plastics back to life
- Removes contaminants
- Leaves behind a matte OEM sheen

WATER SPOT

This heavy duty, mild, acid based formula quickly and effectively neutralizes alkaline and sodium based minerals, leaving you with a surface to protect against future deposits. It works best on clear, chrome, and ceramic/ graphene coated surfaces. Due to its gentle pH balance, it won't harm delicate surfaces unless left to dry.

- Effectively removes water spots
- Thoroughly prepares the surface for protection

WAX OFF

Wax Off has been proven time after time as a one – step solution in creating an unprotected finish. The unique formula includes nano particles designed for removing contaminants without damaging the underlying surface.

- Cleanses paint or glass surface prior to adding a wax or ceramic coating
- Removes old ceramic coatings, sealants, waxes
- Removes coating high spots, paint oxidation & more

NEW PRODUCT

TOWEL CLEANER

Towel Cleaner is a product for cleaning dirty towels and pads after washing. It focuses on the cleaning power to remove polish, wax, oil and chemicals that are attached to towels and pads. It is manufactured with a specially designed blend formula that breaks down and removes contaminants and residues inside the towel, neutralizes the towel to make it harder, and restores the fibers to a soft state.

- Removes polish, wax, oil and chemicals from towels and pads
- Breaks down and removes contaminants and residues inside the towel
- Neutralizes the towel to make it harder
- Restores the fibers to a soft state
- Makes towels and pads last longer

GLASS CLEANER

Designed to work on both interior surfaces, as well exterior surfaces without causing damage. Glass utilizes powerful cleaning agents with an anti – static, streak – free formula for removing film, dirt, dust, grease, fingerprints, grime, and other contaminants. The added boost of fresh floral scent makes for a pleasant experience.

- Cuts through dirt, dust, grease, grime & other film contaminants
- 100% streak free surface
- Cleans & lubricates the surface
- Suitable for all surfaces including tinted windows & electronic screens

REBORN

Reborn maximizes the bonding performance of Fireball waxes, coatings, and sealants. This cleaner is used as a primer for our nanotechnology coatings, and a post-polish inspection fluid to remove fillers and polish dust from all surfaces and clean automotive glass. Reborn's blend of special degreasing agents, ethanol, and other alcohols are safe to use on delicate surfaces and contain no harmful petroleum distillates.

- Dissolves oil particles and remove polish residue
- Prepares paintwork and other surfaces
- Anti-static resists dust after wiping
- Proper bonding & adhesion for all coatings

TAR REMOVER

Tar Remover is a simple spray – on solution that liquefies stubborn contaminates; eliminating the required vigorous scrubbing and making it safe for the painted surfaces. Tar Remover is unlike other harsh chemical cleaners that usually have an abrasive nature. It will not damage paint or other surfaces.

- Dissolves sticky residue & burnt rubber with ease
- Removes tar, bugs, road paint, bird droppings & tree sap
- Safe on metal, glass or painted surfaces

## CERAMIC (SiO<sub>2</sub>) DRESSINGS

Fireball products are specifically formulated with modern technology to provide long – lasting protection on every Surface. From raw to coated plastics, leathers and fabrics, we have harnessed industry knowledge and experience to develop our interior and exterior dressing product line.

Fireball tire dressings go beyond creating a professional shine. Our ceramic infused tire formulas also increase protection against harsh conditions, fading, and drying out so that tires remain protected as long as possible. Tire Booster, an SiO<sub>2</sub> based additive adds increased durability and function to our “Tire Coatings”. Our most versatile dressing is Trim & Tire. The water based dressing is intended to enhance also can be used on smooth and textured exterior plastics. Nappa Coat is the ultimate interior protection that gives non-greasy, sleek sheen appearance while protecting from unwanted build – up.

Ceramic Dressings come in 50ml, 500ml, & 4L containers. Sizes may vary.

500ml

4 Liter

SATIN

### TIRE (SATIN)

Its high content of SiO<sub>2</sub> allows the surface of the tire to repel dirt, debris, and water for a long lasting shine. The intensive hydrophobic properties can withstand multiple washes while preventing uv fading and browning. It can also be used on unpainted plastics & exterior rubber trims.

- Beautiful Satin finish
- Long lasting coating
- Prevents contamination
- Does not brown over time

HIGH GLOSS

### TIRE (GLOSS)

Its high content of SiO<sub>2</sub> allows the surface of the tire to repel dirt, debris, and water for a long – lasting shine. The intense hydrophobic properties can withstand multiple washes while preventing uv fading and browning. Tire Gloss bonds to the rubber with its self – leveling properties allowing longer lasting protection. Once fully cured, it can be layered with other Fireball Tire Dressing products. It can also be used on unpainted plastics & exterior rubber trims.

- Provides high gloss finish for tires & plastic trims
- Long lasting tire dressing
- Prevents contamination
- Does not brown over time

MAXIMUM GLOSS

### TIRE (JANUS)

Tire Janus has self – leveling properties that leave behind a smooth, pearlescent finish. The pearlescent, metallic finish enhances the look of the tire and even changes in different lighting environments. Its high content of SiO<sub>2</sub> allows the surface of the tire to repel dirt, debris, and water for a long lasting shine. The intensive hydrophobic properties can withstand multiple washes while preventing uv fading and browning. It can also be used on unpainted plastics & exterior rubber trims.

- Provides high gloss finish for tires & plastic trims
- Long lasting coating
- Prevents contamination
- Does not brown over time

ENHANCES  
TIRE DRESSING  
EFFECT

### TIRE BOOSTER

Tire Booster combines modern advanced silicone polymer technology to add increased performance of all solvent based tire coatings, intensifying the key characteristics of protection and longevity of the coated surface. The increased properties can be modified based on the user and depending on the amount mixed can give up to 6 weeks of added protection. (Designed to be used with Fireball Tire Coatings: Satin, Gloss, Janus.)

- Improves longevity to Fireball tire dressings
- Enhances gloss appearance
- Decreases risk of sling during high rates of speed
- Up to 6 weeks of added protection

\*250ml

**TRIM & TIRE**

This coating restores and protects plastic, vinyl, exterior trim, dashboards, and rubber surfaces. Its uv properties protect the surface from cracking, fading, or discoloration while bringing the original color back to life. Its self leveling properties provide a sleek, satin finish that repels dirt, debris, and water. Trim & Tire works extremely well on smooth and textured plastic exterior surfaces. It can also be used on engine compartments, interior plastics, and more.

- Quick & easy interior protection for dashboards, door panels, & more
- Lasts 2 – 3 months on interior surfaces

**NAPPA COAT**

Nappa Coat is easily applied and leaves behind a sleek, soft – to – touch, non – greasy matte finish. The incredible Nappa Coat formula utilizes its silica-based SiO<sub>2</sub> polymer technology, uv blockers, and odor neutralizers to prevent anti-static and dust build up. It can be used on all interior surfaces including plastic, vinyl, leather, and fabrics.

- Brings surface color back to life
- Long lasting durability and shine
- uv protection
- Prevents contamination

# WASHING

Fireball offers a wide selection of highly concentrated pH balanced shampoos that provide customized solutions for multiple applications. Our specially formulated products get vehicles show – room ready with quality results in cleaning and maintaining surface protection.

With our shampoos, you are never paying for water in a bottle. All Fireball shampoo formulas are highly concentrated and extremely sudsy to provide the best results.

Unlike most shampoos on the market, our wash bucket formulas are created with highly concentrated levels to provide the best dilution ratios for the user. Fireball “Foam” products are specialized to offer the best experience and results with the use of our *Blizzard Foam Cannon*.

Shampoos come in 50ml, 500ml, & 4L containers.  
Sizes may vary

500ml

4 Liter

## SHAMPOO (PEARL & TROPICAL)

Our shampoos are carefully formulated to clean thoroughly, leaving your surfaces clean and smooth. Shampoo utilizes modern technology to make your washing experience easy. Intelligent pH balanced surfactants break down dirt and grime gently with ease without disrupting the sealant or coating’s natural properties. Fireball Shampoo’s all new formula delivers a highly concentrated 1:1000 ratio.

- General use washing
- Highly concentrated 1:1000
- pH 7.5

## HYDRO SHAMPOO

Hydro Shampoo combines an automotive shampoo with full nanotechnology protection, providing extreme hydrophobicity, slickness and gloss. Safely washes all exterior surfaces of your vehicle while leaving behind an ultra slick, dedicated layer of protection. This unique formula gently removes contaminants from the vehicle without damaging paintwork. Hydro Shampoo can be used as a stand – alone protection for a vehicle or also as an added top layer for vehicles with existing ceramic coatings, waxes, or sealants. Cut down on time, increase shine, and add protection in one easy step.

- Maintain & revitalize graphene & ceramic coatings
- Dirty water & contamination repel from surfaces
- Adds 6+ weeks of added protection
- Concentrated formula: Dilutes up to 1:300-1:500

## HYDRO FOAM

Hydro Foam combines foam cannon cleaning with full nanotechnology protection, yielding extreme hydrophobicity, slickness, and gloss. Hydro Foam’s formula was designed to gently lift dirt from solid surfaces in a safe manner, as well as providing lubrication for washing paint when used properly. Hydro Foam works well when cleaning and re – coating hard – to – reach areas. Hydro Foam is recommended as a post – wash sealant instead of a pre-wash foam. Hydro Foam is designed to work on its own or give an added boost to an existing wax, sealant, or coating layer.

- Creates thick, clinging foam which rinses away to leave a hydrophobic & glossy finish
- Causes dirty water & contamination to repel from treated surfaces
- Adds 6+ weeks of added protection

SNOW FOAM

Snow Foam is designed specifically for foam cannons and pumps, creating bountiful amounts of high quality soap bubbles to prevent scratches. This fast acting formula rinses off easily with no residue. It also contains hyper surfactants that cut through dirt and grime while lubricating debris for removal from your vehicle's surface. The scent of fresh, organic linalool provides a sense of luxury with your washing experience.

- Super high concentrate 1:30~1:60 dilution ratio
- Wax & coating friendly
- Adheres to surfaces to remove hard pollutants
- Helps prevent accidental swirl marks

NEW PRODUCTS

PH3 SHAMPOO

Ph3 Shampoo is a mild acidic car shampoo with excessive foam cleaning action that powers through contaminants, water spots, and scale build-up from paint, wheels, and exterior surfaces. pH3 Shampoo car shampoo is designed to aid in safely removing any existing waxes and sealants from exterior surfaces.

- Perfect solution for pre-wash
- Removes contaminants and previously applied protection
- Fast acting formula for optimal results
- Fixes clogged coating surfaces
- Removes minerals from coated and uncoated surfaces.
- Safe for coated and non-coated cars.
- Versatile cleaner capable of removing waxes, sealants, and tough dirt.
- Ceramic coating rejuvenation abilities.

GRIT GUARD

The Grit Guard is structured to fit firmly into the bottom of a Fireball Wash Bucket preventing any movement from the guard. It simply acts as a filter trap; removing dirt, minerals, grit, mud, and grime from the cleaning mitt. Once dirt settles, the Grit Guard keeps the contaminants at the bottom of the bucket into four quadrants, so the water above the Grit Guard cannot be disturbed. This simple, yet cost effective method, protects painted surfaces from being scratched and saves your paint from swirl marks during hand washing.

PREMIUM WASH BUCKET

It's time to bring your car wash to the next level with your personal Fireball Wash Bucket. Fireball Buckets are perfectly color coded for the use of the "Three Bucket Method." You can strictly have one color for the washing process, one color for wheels, and one color for rinsing. Choose your colors to ensure your bucket meets all of your detailing needs. Each option comes with a Fireball Logo and holds up to 3.5 gallons of water.

## NAPPA FOAMER CLEANER BOTTLE + NAPPA BRUSH

The Nappa series was designed with the end user in mind, giving complete control. The cleaner paired perfectly alongside our Nappa Foamer makes for agility and speed during application of the full interior.

## TOWELS

As car enthusiasts know, all towels are not created equally. Fireball towels are customized to fit the necessities of car aficionados by offering a wide array of grades for various needs.

Fireball's towels are made with all surface types in mind – including ceramic coated surfaces. Our Jet Towel was created to prevent scratching and streaking on delicate surfaces by pulling dirt and grime away. The Twist Drying Towel is super absorbent. Made with a 70/30 blend that outperforms any other towel on the market, while leaving a streak – free shine. The Pin Twist Towel is equivalent of the Twist Drying Towel in a lightweight model with increased durability. There is no better option for removing waxes and sealants than our versatile Teddy Bear Towel. The Black Fox All Purpose Towel is the most versatile, with uses varying from surface protection applications, wax removal, glass cleaning, and everything in between.

The Fireball towel experience includes the ability to remove spray sealants and waxes without the risk of damage, while leaving behind the perfect finish. Drying vehicles and windows become a simple task with our specially crafted towels that also prevent defects and damage to surface coatings.

- Double in size compared to similar towels
- Low lint construction
- Heavyweight Microfiber
- Suitable for general cleaning, polishing, drying, wax removal, and windows.

# APPLICATORS

Our applicators are designed to be paired with various products for various applications. Each foam applicator is contoured for different surfaces and lay an even application. Made of high density foam, it eliminates product absorbing into the applicator, which intern reduces product waste.

The suede applicator sheets and the foam applicator block are intended to be paired for ceramic coatings. The unique design on the applicator block has a slit down each side for the suede to slide into, ensuring the product is evenly applied without scratching the surface.

The premium microfiber Wash Mitt and Wash Pad ensure optimal cleaning allowing the mitt to effortlessly glide across the surface reducing the risk of swirls and scratches. The unique structure is also built to hold a large amount of soap for an extended period of time while pulling the dirt and grime away from the surface. The Wash Mitt has an internal stitched structure for better control when washing the vehicle.

The Nappa Brush has dense microfiber bristles that easily agitate the product into various cracks and crevices of textured interior plastics and is even safe to use on leather surfaces. The foam inner core of the brush provides a firm grip and added structure while agitating the surfaces for an easy process.

The Black Fox Applicator is versatile and can be paired with various products on interior and exterior surfaces. The unique edgeless design reduces scratching while the foam inner core allows for an even application.

## TWO SIZES S M

## WAX APPLICATOR

- Easy to use Ergonomic design
